

LIFETIME FRIEND

(Neil Murray)

I left my home long ago to travel up the Tanimi road
So many young fellas were like me head full of ideas and keen
I didn't think that anyone would remember me for very long

But somehow through the years some people that you meet stay near
And even if you're far away they ring you up just to say
Well how are you going and when you coming back this way

Lifetime friends they're with you till the end
They're the ones that know you the best
You laugh about how you were so young and proud
You do that when you've made a lifetime friend

Well I've knocked around the cities and the towns
And I meet all kinds of people on my rounds
Sometimes you get trouble on the road
That's just a part of life you know
A measure of your worth is found in the friends you've made

Lifetime friends they're with you till the end
They're the ones that know you the best
You laugh about how you were so young and proud
You do that when you've made a lifetime friend

Well I got a call from you this afternoon
And it's years since we've spoken too
We might have had our blues in the past
But somehow our friendship seems to last
We pick up the conversation like we just left it yesterday

Lifetime friends they're with you till the end
They're the ones that know you the best
You can laugh about it now how you were so young and proud
You do that when you've made a lifetime friend
You do that when you've made a lifetime friend
