

# ONCE IN A WHILE

(Neil Murray)

A policeman took my details  
Maybe he had kids of his own  
Before I left, he wished me good luck

I drove the freeway in a fog  
Behind the tail lights of a truck  
And I wondered how long I'd have to keep on going  
Just to see you, see you again

Once in a while it all falls into place  
You don't have to try too hard  
It'll get there in it's own way  
How long, how long 'til your sweet embrace?  
How long do I have to wait, until I touch your tender face?

A stranger rang me from the other side of the country  
Just to tell me they'd seen my darling  
Get into a taxicab  
That's enough to know, I'm with you wherever I go  
Any moment, you'll turn up

Once in a while it all falls into place  
You don't have to try too hard  
It'll get there in it's own way  
How long, how long have we waited for the day  
When the whole world's smiling and you are shining  
Running to me again?

Once in a while it all falls into place  
Once in a while you get back what you paid  
Once in a while you don't have to explain  
How long, how long 'til your sweet embrace  
How long do I have to wait  
Until I touch your tender face?
