

# STARS

(Murray/Butcher)

We left the continent over Derby and my heart fell from the plane  
To see the coastline slip away I wondered why I came

Take me back now roll me in the red earth  
let me the kiss the ground

I know there's lots of places on the otherside of the world  
With fabulous sites to see you sure can be lured

Take me back now roll me in the red earth  
let me the kiss the ground  
Put me out in the desert I won't be alone  
Lay me in the mountains I won't be cold

You can have America and all of Europe too  
I'll be in Australia, a million stars in my room  
I'll be in Australia, with the stars in my room

Oh take me back now roll me in the red earth  
let me the kiss the ground

You can have America and all of Europe too  
I'll be in Australia, a billion stars in my room  
I'll be in Australia.
